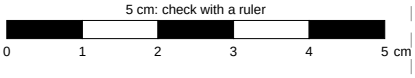
cut on the dashed line

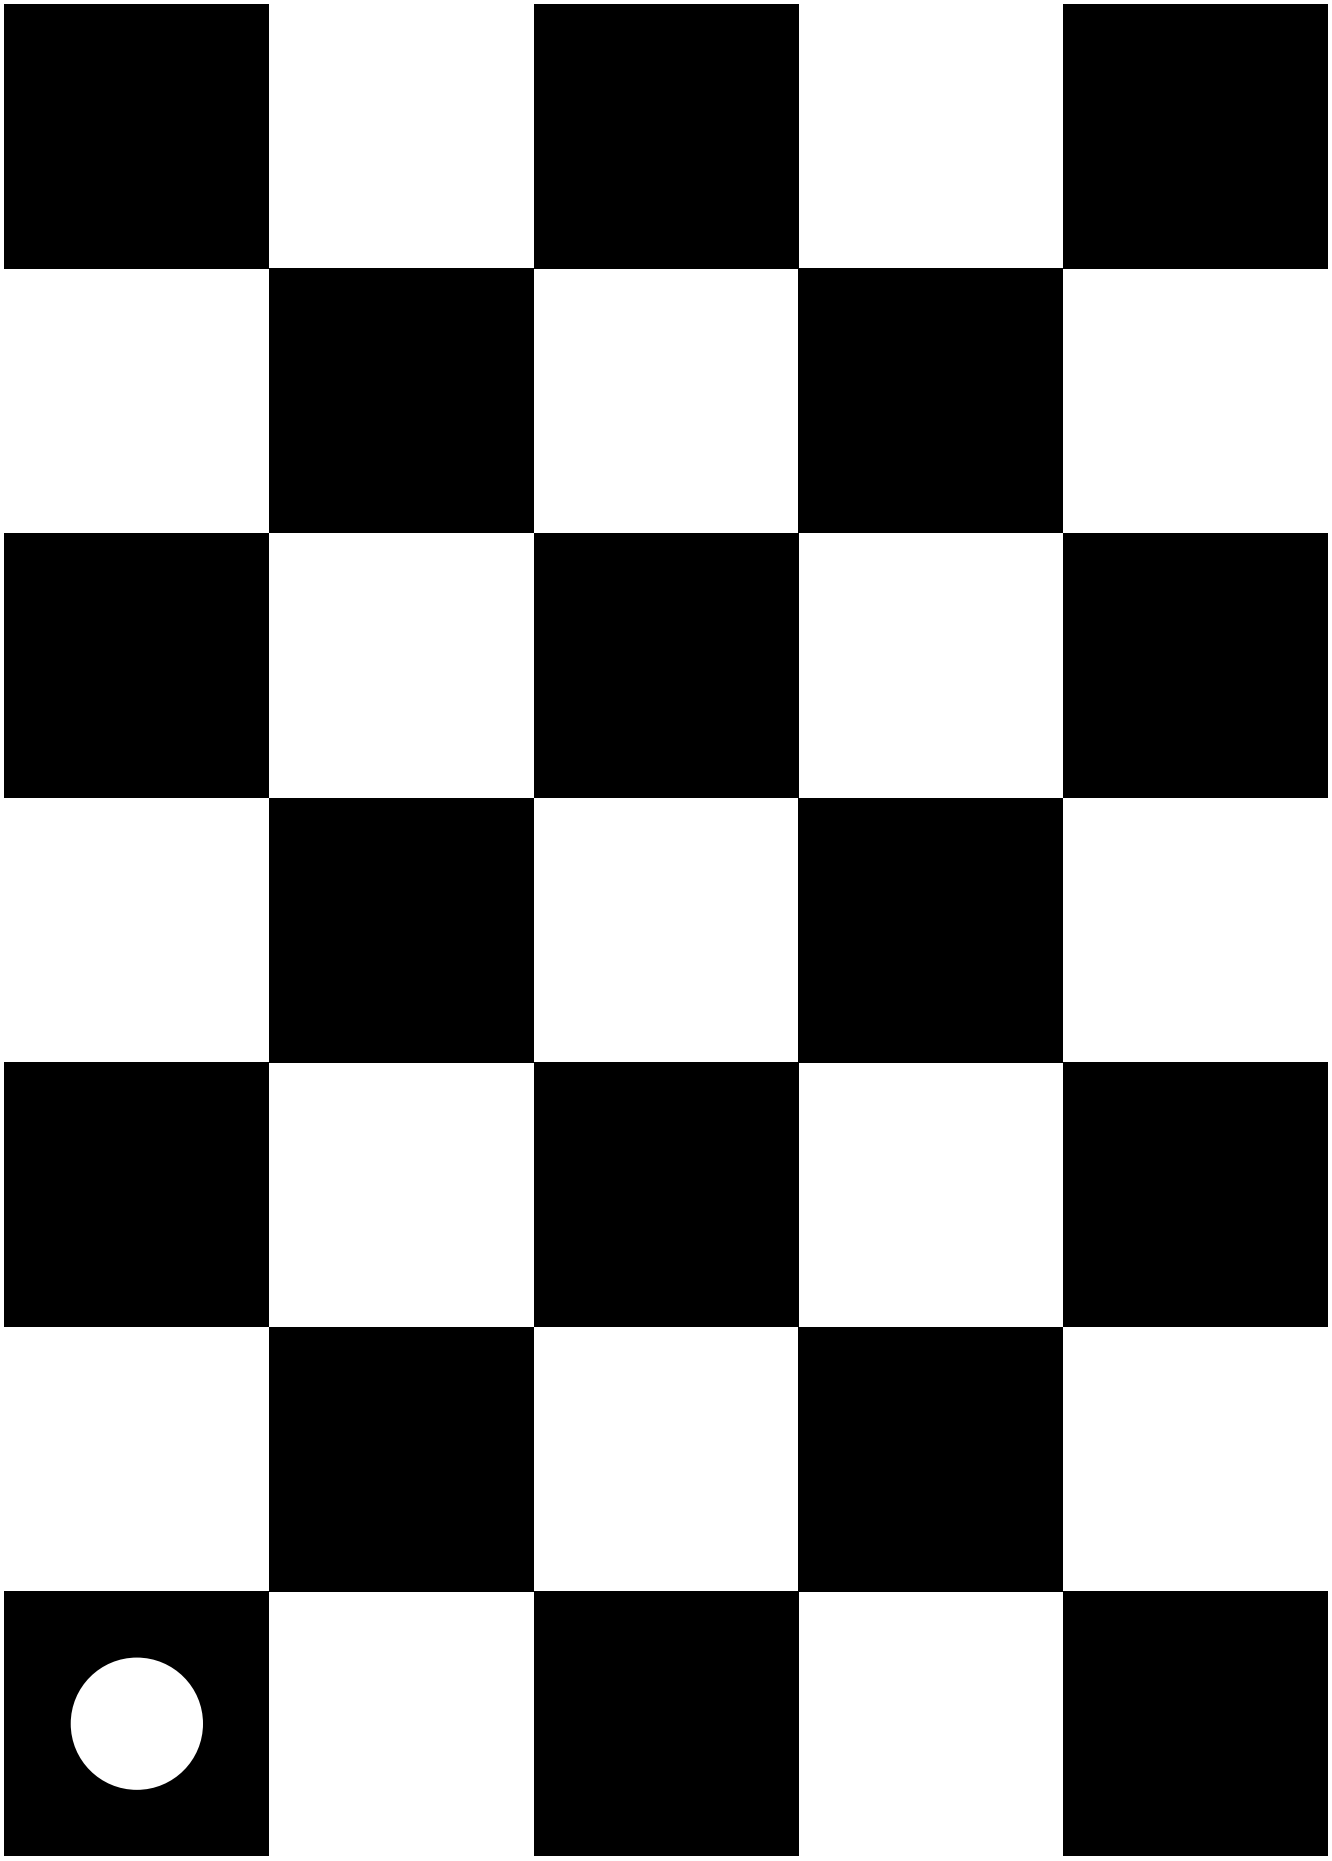
## A Corner piece - 5 x 7 squares of 35 mm

0,0 = the corner square with the white dot (bottom left). This way up.

The setup page's anchor: white-dot corner in the table's 0,0 corner, the 5-square side along x, while both cameras take a picture.

5 cm: check with a ruler





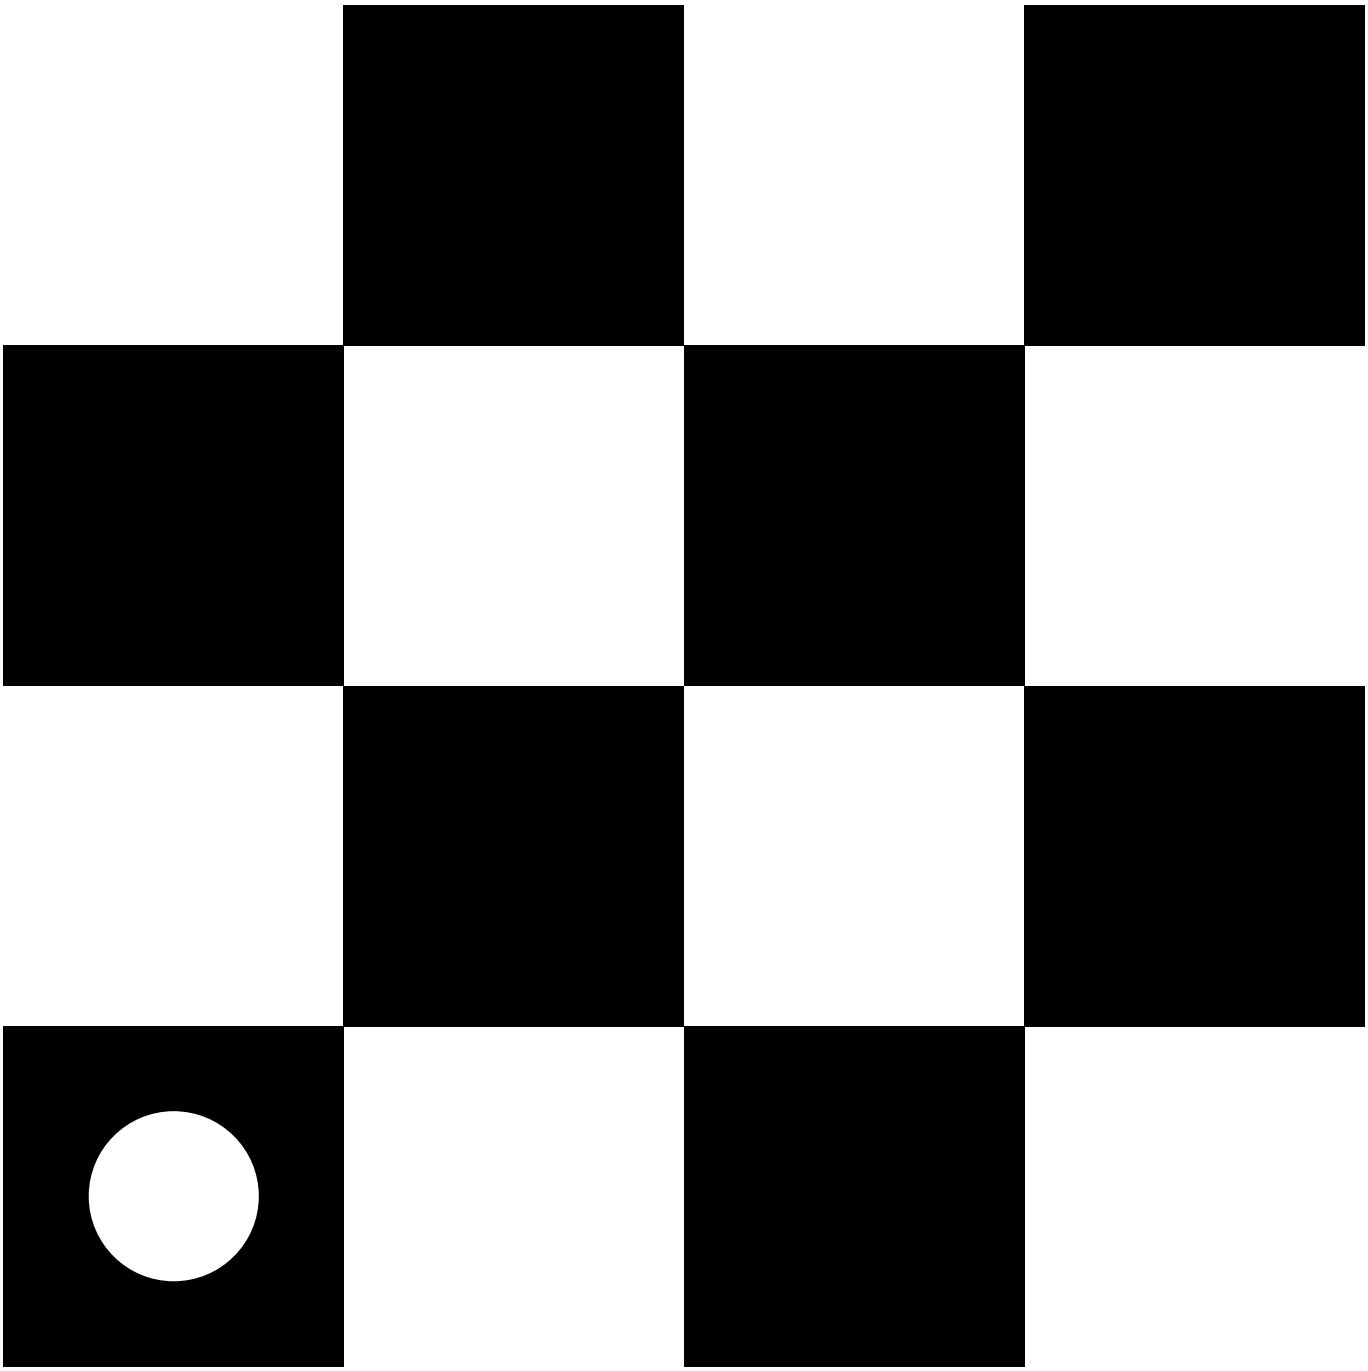
## B  Large square  -  4 x 4 squares of 45 mm

0,0 = the corner square with the white dot (bottom left). This way up.

Far-end check: where squares come out smallest (the side camera's far half), to see each camera's calibration holds at the far end.

5 cm: check with a ruler

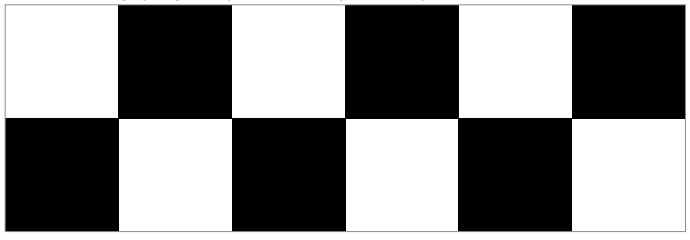
0 1 2 3 4 5 cm



cut on the dashed line

## E  Dock piece  -  6 x 2 squares of 15 mm (90 x 30 mm)

Cut ON the thin grey edge line (no white border). Either way round.



5 cm: check with a ruler

0 1 2 3 4 5 cm

Glue it flat on stiff card (cereal-box card),
cut the card to the same edge,
press it into the pocket on top of the dock's
base (the bottom of the U).
Long side across the dock.

**Print at ACTUAL SIZE (100 %), not 'Fit to page'. Check each 5 cm bar with a ruler before cutting.**

B: Far-end check: where squares come out smallest (the side camera's far half), to see each camera's calibration holds at the far end.
E: the pocket is 90.8 x 30.8 mm, 0.6 mm deep (dock v6, build_dock_v6.py).

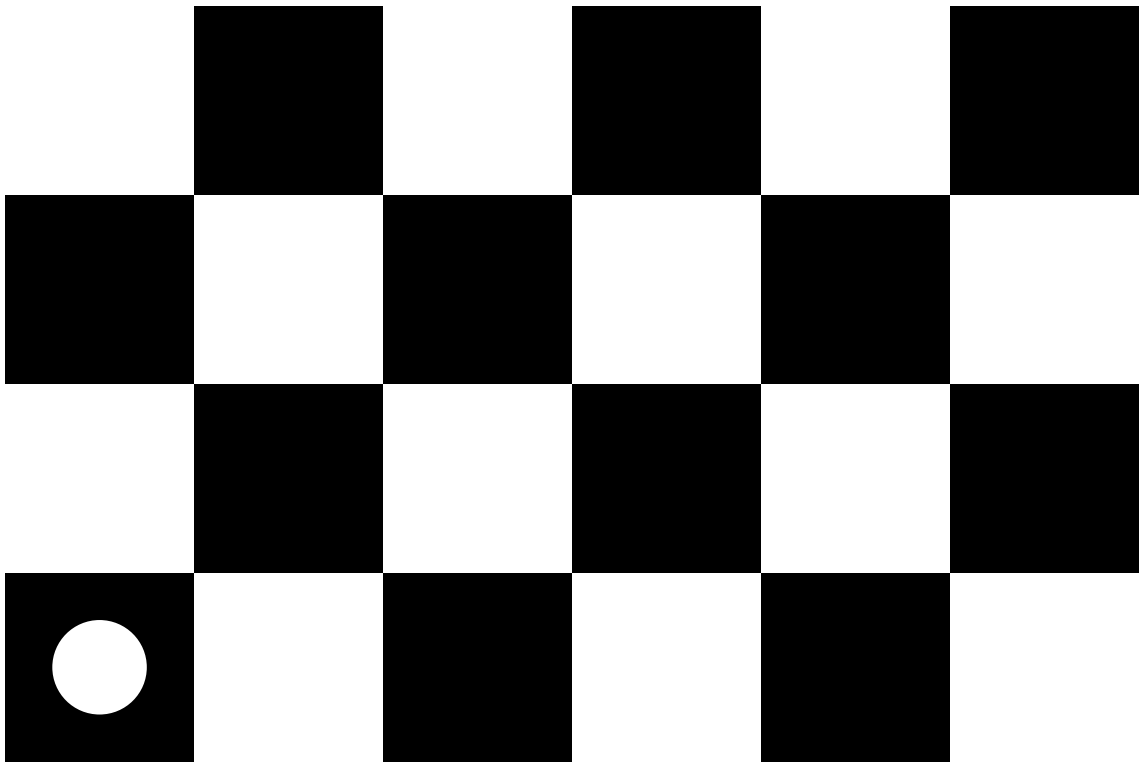
## C  Small rectangle  -  6 x 4 squares of 25 mm

0,0 = the corner square with the white dot (bottom left). This way up.

Spot checks anywhere on the table (fits beside a robot); the side camera's near half.

5 cm: check with a ruler

0 1 2 3 4 5 cm



cut on the dashed line

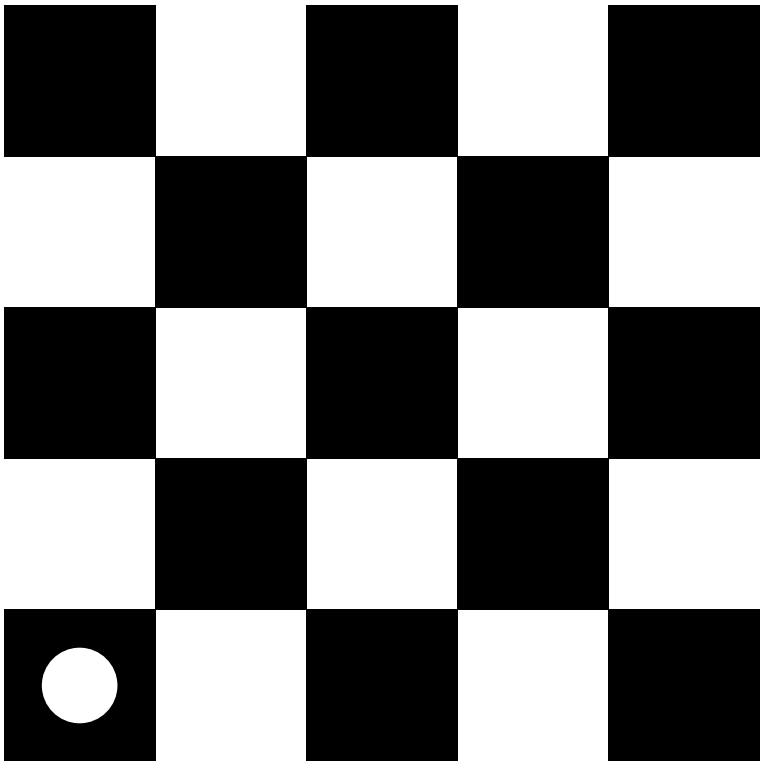
## D  Small square  -  5 x 5 squares of 20 mm

0,0 = the white-dot corner. This way up.

Close cameras.

5 cm: check with a ruler

0 1 2 3 4 5 cm



cut on the dashed line

**Print at ACTUAL SIZE (100 %), not 'Fit to page'. Check each 5 cm bar.**

C: Spot checks anywhere on the table (fits beside a robot); the side camera's near half.

D: Close cameras: a laptop, phone or Pi camera on the desk (squares 20 mm), and the near edge of the side camera.

Glue a piece flat on stiff card: a wavy piece reads wrong. Pieces made by tools/pi/checker_pieces.py.
